GENERAL INDEX TO VOLUME X.

Aberration, Constant of—(note) 220
Address, Jan. 8, 1902, Chapel—J. K. Rees 135
Ahaz, The story of the dial of—Dr. Lewis Swift 278
Aitken, R. G., Elements and ephemeris comet *b*, 1902 (Perrine) 444
Orbit of Beta Delphini 486
Sources of standard time in the United States 12
Aldis' tables of $\frac{1}{2}(\theta + \cos\theta)$ (note) 552
Algol, Period of—W. W. Payne 25
stars, Early observations of—Edward C. Pickering 195
type variable 13.1902, Williams' new—Harvard Circular 546
14.1902, Persei, New 545
variables, Minima of— 46, 156, 213, 269
Almanac absurdities (note) 501
Amherst Observatory, New—(note) 390
Ancient eclipses and chronology, R. W. McFarland 172
Anderson, Dr. T. D., Searching for new stars. (*Observatory*) 246
A new Algol variable + 45°4101. E. C. Pickering 362
Anna Bredikhine astronomical prize (note) 335
Annuaire du Bureau des Longitudes 1902 (note) 223
Anonymous fund of 1902. E. C. Pickering (note) 223
Aquila, Triple cave in—(note) 448
Are other planets inhabited? D. G. Parker 357
Asteroid, (265) Anna, Elements of—(note) 154
(347) Pariana, Elements and ephemeris of— 154
(443) Photographica, Elements of— .....
(444) Gyptis, Orbit elements of— 267
(446) Æternitas, Orbit elements of— 267
(449) Hamburga, Orbit element— 268
(455) Bruchsalia, Elements of— 99
(466) 1901 FX, Elements of— 99
(470) Kilia, Elements of— 100
(477) 1901 GR., Elements of— 212
(479) 1901 HL., Orbit elements of— 268
1900, GA., Elements of— 100
1901, GT, Elements of— 380
1901 GV 100
and comet notes 99, 153, 211, 266, 324, 380, 437, 491, 542
Orbit of great eccentricities. Edward C. Pickering 23
Asteroids Numbering of new— 212
New—(note) 100, 154, 212, 267, 381, 439, 494, 543
(465), (468), (469), (471) and (472), Elements of— 99
(473), (474), (478), and 1901 HL., Orbit elements of— 268
Astronomer for the head of the United States Naval Observatory. W. W. Payne 14
of the U. S. Naval Observatory, Civil Service examination for assistant—(note) 114

Astronomical and astrophysical society of America, Meeting of the—(note) 110
phenomena during 1902. H. C. Wilson 39
photographic work at Goodsell Observatory (note) 219
"Astronomique Annuaire" (note) 168
Astronomy during the 19th century, Clerke's History of—W. W. Payne 465
Elementary treatise on navigation and nautical—E. L. Richards. (book notice) 224
Laboratory for general—Mary E. Byrd 131
Young's Manual of—W. W. Payne 394
Atlas of the moon, Photographic—(note) 502
Auroral phenomena at Alta, Iowa. David E. Hadden 249
Barnes, Willis L., Dark transit of Jupiter's III satellite (note) 447
Bartlett, Arthur K., The Moon and the weather 368
The zodiacal light 179
Binaries, New spectroscopic—(note) 219
Binocular telescope, On the performance of 6¼-inch—D. W. Edgecomb 523
Bond and Son's electric break circuit chronometers (note) 219
Book notices 56, 112, 224, 280
Brackett, F. P., Leonids at Pomona College (note) 165
Brenke, W. C., The Leonids of 1901 (note) 105
Brightness of starlight. J. E. Gore, F. R. A. S. 227
Bulletin II, Lick Observatory—(note) 56
Burgess, G. K., Value of the gravitation constant 421
Burnham, S. W., Double star observations at the Flower Observatory 129
Byrd, Mary E., A laboratory for general astronomy 131
Calculus, Differential and integral—Snyder and Hutchinson, (book notice) 559
Elementary—(book notice) 280
Calendar, The Chinese—William L. Hornsby, S. J. 229
California, Grand display of Leonids in Southern—Edgar L. Larkin 16
Case of the Leonids, The—John B. Wood 459
U Cephei, Light curve of—(note) 159
Chinese Calendar, William L. Hornsby, S. J. 229
E. M. Tydeman 335
Chronometers, Electric break circuit—(note) 219
Chronology, Eclipse aid to—Q. A. Wheat 19, 138, 207
Cincinnati Observatory, New large equatorial for—(note) 276
Civil Service examination for assistant astronomer at Naval Observatory. (note) 111
Clerke's history of astronomy during the 19th century. W. W. Payne 465
Clouds and weather signs (note) 391
Cole, John F., Occultation of W. Leonis—(note) 331
Comet and asteroid notes 99, 153, 211, 266, 324, 380, 437, 491, 542
1845 II (note) 153
1891 I, Definitive orbit, elements of—(note) 99
1895 II (Swift), Ephemeris—F. E. Seagrave 266
1895 II, Definitive elements of orbit of Swift's 493
1898 V, Definitive orbit—(note) 211
a, 1902 (Brooks), Discovery of—(note) 324
b, 1902, Elements and ephemeris— 542
b, 1902 (Perrine). W. W. Payne 477
Elements and ephemeris—R. G. Aitken 444

Ephemeris—.....437, 438
Ephemeris of—F. E. Seagrave..... 491
Edgar L. Larkin (note)..... 492
approaches Mercury. F. E. Seagrave (note)..... 492
c? 1902 (Griggs) (note)..... 438
c 1902 (Griggs), Ephemeris of—(note)..... 492
Temple-Swift, Search ephemeris for—(note)..... 438
Temple-Swift, Ephemeris of—..... 559
Comets and meteors, Observations of—*Knowledge Diary*..... 69
when far from the Sun, Motion of—George C. Comstock..... 169
Comparison stars for Nova Persei (note)..... 274
Comstock, George C., Motion of comets when far from the Sun..... 169
Constant of aberration (note)..... 220
Cooke, W. Ernest, A device for facilitating meridian settings..... 365
Corona of 1901, Origin of a disturbed region in—C. D. Perrine..... 398
Cosmic Cycle (note)..... 218
Cosmos, A theory of the—(note)..... 277
Criticism by Dr. Klein of William H. Pickering's Lunar Observations, William H. Pickering..... 118
Cycle, An eclipse—W. H. S. Monck..... 240
Cosmic—(note)..... 218
Cygni, Period of TX—(note)..... 215
Davidson, George, Limits of Vision..... 111
Davis, Dr. Herman S., On the computation of transit-factor tables for any given latitude..... 303
Delta Equilei. Period of—(note)..... 222

1902 HS = (359) [1893 M], Elements of— 438
Notes, H. C. Wilson 97, 152, 208, 264, 320, 376, 433, 489, 541

Planet Jupiter, The—G. W. Hough 339
Planetoid (416) Vaticana, Elements of— 494
Point on the Moon, Bright star-like—William H. Pickering 497
Prize, Anna Bredikhine astronomical—(note) 334
Prominences, Hypothesis regarding nature of solar 510
Proper motion of Nova Persei (note) 217
the double star + 24°.2733 552
Pickering's observations of the Moon, Wm. H.—*translation* 57
Persei, U—A comparison star for Eros (note) 378
Queries and answers 391
Real paths of brilliant meteors, The—W. F. Denning 121
Rediscovery of Eros (note) 382
Rees, J. K., Chapel address, Jan. 8, 1902 135
Observations of meteors Nov. 13-16, 1901 (note) 107
Reports of 1901 leonids, Robert B. Taber 403
Repulsive forces in nature, T. J. J. See 505
Revision of Wolf's sunspot relative numbers, Professor A. Wolfer 449
Revolution of the leonids, Period of the—William H. Pickering 8
Richards' elementary treatise on navigation and nautical astronomy (book-notice) 224
Rifts in north polar caps and canals in Arctic regions, Percival Lowell 113
Russell, Henry Norris, Shadows cast by starlight 242
W. P., Leonids at Lincoln, Ill 53
Sagittae, Variable star 93.1901 215
Sallows, J., Meteors at Dunmore, N. W. T. (note) 51
Saturn, Equatorial diameter of—F. E. Seagrave (note) 54
Saturn's satellites 323, 379, 436
Schlesinger, Frank, Some new astronomical instruments 427
Schwabs' new variable 93.1901 (note) 157
Seagrave, F. E., Ephemeris of comet 1895 II (Swift) 266
comet *b* 1902 (Perrine) 491
of Eros 326
Equatorial diameter of Saturn (note) 54
Leonids (note) 54
Near approach of comet *b* 1902 to Mercury (note) 492
Observations of Nova Persei (note) 47, 158, 330
Proper motion of Nova Persei (note) 273
The Moon and thunderstorms (note) 332
Searching for new stars, Dr. T. D. Anderson (*Observatory*) 246
See, T. J. J., Repulsive forces in nature 505
Serviss' "Other Worlds" (book notice) 112
Shadows cast by starlight, Henry Norris Russell 242
Signals from Mars, Explanation of supposed, Percival Lowell 185
Sinaloa meteorite (note) 558

and gegenschein (note) 276

INDEX TO ILLUSTRATIONS.

"Brushes" for collector rings for 26-inch equatorial at U. S. N. Observatory.. 302
Cephei, Light curve of U— 299
Collector rings for 26-inch equatorial at U. S. N. Observatory 301
Comet *b* 1902 Perrine, diagram- 479
photographed, plate XI op 449
Constellations 44, 97, 152, 209, 265, 320, 377, 433, 489, 540
Electrical connections to eye-end of U. S. N. Observatory 26-inch equatorial plate XIII op 281
Field-glass, Old style 286
Warner & Swasey universal prism 284
Jupiter, Saturn, Uranus in 1902, Apparent paths of— 43
September 1902, plate XVII, op 505
Light curve of Nova Persei, plate XII, op 225
variable star U Cephei 299
Y Lyrae 215
Lunar eclipse sketches 503
Lyrae, Chart of stars near Y— 216
Light curve of Y— 215
Mars and Neptune in 1902, Apparent paths of— 42
Identity of rifts in north polar cap and canals in Arctic regions, plate IX, op 113
Projection of Dec. 7, 1900, plate X. op 193
Dec 8, 1900, plate XI, op 194
Mercury and Venus in 1902, Apparent paths of— 41
Meridian circle settings, A device for facilitating— 366, 367
Meteor trail changes charted 53
trails charted 49, 52, 106, 161, 162, 498, 499, 555, 556
photographed, plate VII, op 57
plate XVI, op 497
Meteors, Aquarid 498
Leonid— 49, 52, 106, 161. 162
Perseid— 499, 555, 556
Nebula H. V 15 = N. G. C. 6960, photographed, plate XIV, op 394
Neptune and Mars in 1902, Apparent paths of— 42
New variable 12.1902 Pegasi 386
Nova Persei, Diagram showing motion of nebular condensation, plate IV, op 12
Light curve of—plate XII, op 225
nebulosity, G. W. Ritchey, plate IV, op 12
plate V, op 44
plate VI, op 45
Stars in the vicinity of— 385
Opera glass 282
Parabolic mirrors, Some notes on the correction and testing of—figs. pp. 338 340, 341, 342, 345, 346 347
Perseid meteors 555, 556

Porro prism field glasses, Testing objectives of— 288
prisms 281
Path of light through— 282
Prism field-glass, Field, Best— 286
(Goerz) 289
Warner & Swasey universal— 290
Zeiss 287
Saturn's satellites 323, 379, 436
Saturn, Uranus and Jupiter in 1902, Apparent paths of— 43
Solar eclipse station, plate II, op 2
Spectrum of lightning flash, plate VIII, op, 104
Spy-glass 283
Star-correction machine 83
Sumatra eclipse station, plate II, op 2
Sunrise phenomenon in Mexico 557
Sunspot relative numbers 453, 454, 455, 456, 457
Telescope, Astronomical— 283
Galilean 282
Terrestrial 283
Total solar eclipse, photographed Fort de Kock, plate I, op 1
plate III, op 3
Uranus, Jupiter and Saturn in 1902, Apparent paths of— 43
Venus and Mercury in 1902, Apparent paths of— 41
